

IBM Maximo Application Suite

Getting Started with Maximo Application Suite and Azure Marketplace

Once you have completed your purchase of Maximo Application Suite (MAS) through the Azure Marketplace, IBM will begin processing your order immediately. To complete your deployment, the following actions are required:

1. Create new (or use your existing) Microsoft Azure account and subscription.
2. Create and download your MAS license key file using [IBM License Key Center](#).
3. Download IBM Entitled Registry key from your [IBM Container Library](#).
4. Create new (or use your existing) Red Hat account. Link your purchased MAS software to your Red Hat account.
5. Download Pull Secret using the [Red Hat Hybrid Cloud Console](#).
6. Install MAS using this [guidance](#).
7. Install Cloud Pak for Data on your Azure instance of MAS using this [guidance](#).
